## **Scientific Games Strengthens Latin American Presence through Provoloto Acquisition**

**NEW YORK, NY – June 11, 2012** – Scientific Games Corporation (Nasdaq: SGMS) announced today the completion of its acquisition of Provoloto (Grupo Provo), a lottery company that distributes instant tickets for nearly 30 Mexican charities to approximately 17,000 retailers. Provoloto has been a Scientific Games Latin America customer since 2003 and has been developing and distributing instant lottery games in Mexico for 15 years. Scientific Games will continue to print Provoloto tickets from its plant in Santiago, Chile, while maintaining Provoloto's existing infrastructure, including its facility, distribution network and management team in Mexico.

Provoloto is one of the four major lottery companies in Mexico, which has a population of over 113 million people. Total Mexican lottery sales in 2010 were estimated to be \$1.3 billion, of which approximately \$76 million were generated by the sale of instant tickets. This equates to over \$11.00 in per capita lottery sales, with only \$0.67 in per capita instant ticket sales.

"Instant ticket sales in Mexico currently represent less than 10 percent of total lottery sales, compared to nearly 60 percent in the U.S.," said John Schulz, Vice President, Cooperative Services for Scientific Games. "Having a more central role in the Provoloto business should allow us to incorporate some of our proven instant

ticket best practices and bring Mexico's instant ticket sales more in line with sales of its other lottery products. By introducing new products, improving marketing and eliminating some of the manual processes in place today, we believe we can produce significant instant ticket growth and provide greater returns to charities."

"Provoloto has built a strong foothold in the Mexican marketplace over the past 15 years by capitalizing on their longstanding local relationships in order to provide much needed funding to deserving charities," said Luke Weil, Vice President, International Business Development – Latin America, for Scientific Games. "For Scientific Games, the acquisition of Provoloto is a natural fit and the perfect opportunity to demonstrate how the best practices we use around the world may be successfully deployed in Latin America."

"We are extremely pleased to become a part of Scientific Games. Not only do they have 40 years of experience in game design, marketing, research, systems, and security - they have also been our instant ticket supplier for nearly a decade, which means they know our company and the marketplace extremely well," said Ventura Martinez del Rio Requejo, Chief Executive Officer of Provoloto. "We look forward to working together with Scientific Games to market and deliver exciting and differentiated instant games that will further benefit the charities we support."

This transaction is not expected to have a material impact on Scientific Games' results of operations for the fiscal year ending December 31, 2012.

### **About Scientific Games**

Scientific Games Corporation is a global leader in providing customized, end-to-end gaming solutions to lottery and gaming organizations worldwide. ### **Forward-Looking Statements**

In this press release the Company makes "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements describe future expectations, plans, results or strategies and can often be identified by the use of terminology such as "may," "will," "estimate," "intend," "continue," "believe," "expect," "anticipate," "could," "potential," "opportunity," or similar terminology. These statements are based upon management's current expectations, assumptions and estimates and are not guarantees of future results or performance. Actual results may differ materially from those contemplated in these statements due to a variety of risks and uncertainties and other factors, including, among other things: competition; material adverse changes in economic and industry conditions; technological change; retention and renewal of existing contracts and entry into new or revised contracts; availability and adequacy of cash flows to satisfy obligations and indebtedness or future needs; protection of intellectual property; security and integrity of software and systems; laws and government regulation, including those relating to gaming licenses, permits and operations; inability to identify, complete and integrate future acquisitions; inability to benefit from, and risks associated with, strategic equity investments and relationships; failure of Northstar to meet the net income targets or otherwise realize the anticipated benefits under its private management agreement with the Illinois Lottery; seasonality; inability to identify and capitalize on trends and changes in the lottery and gaming industries, including the potential expansion of regulated gaming via the internet; inability to enhance and develop successful gaming concepts; dependence on suppliers and manufacturers; liability for product defects; fluctuations in foreign currency exchange rates and other factors associated with international operations; influence of certain stockholders; dependence on key personnel; failure to perform on contracts; resolution of pending or future litigation; labor matters; and stock price volatility. Additional information regarding risks and uncertainties and other factors that could cause actual results to differ materially from those contemplated in forward-looking statements is included from time to time in the Company's filings with the Securities and Exchange Commission, including under the heading "Risk Factors" in our periodic reports. Forward-looking statements speak only as of the

date they are made and, except for the Company's ongoing obligations under the U.S. federal securities laws, the Company undertakes no obligation to publicly update any forward-looking statements whether as a result of new information, future events or otherwise.
