

Scientific Games Adds to Information and Security Management Certifications, Continues Setting Global Industry Gold Standard

Company's UK, Channel Islands and Ireland Facilities Awarded World Lottery Association and British Standards Institute Certifications

ATLANTA – December 1, 2025 – [Scientific Games](#)' UK, Channel Islands and Ireland facilities are the latest in the company's global operations to achieve international certifications, further strengthening its information security framework and commitment to setting the lottery industry's gold standard for integrity. The newest certifications are from the [World Lottery Association](#) and the [British Standards Institute](#), as Scientific Games continues to expand its business serving government-regulated lotteries worldwide.

Scientific Games' new National Logistics Centre in Warrington, UK serving [The National Lottery](#), SG Studios digital game development center in Jersey, Channel Islands and lottery retailer technology facility in Ireland have earned certification to the WLA's Level 2 [Security Control Standard](#). This international security standard for WLA members specifies the required practices for an effective security management structure to maintain the integrity, availability and confidentiality of information vital to the company's secure operation.

All three facilities also earned a Certificate of Registration for Information Security Management System, achieving the [International Standards Organization's ISO/IEC 27001:2022](#), the world's best-known standard for information security management systems. This certification confirms that Scientific Games has implemented a comprehensive framework to manage risks related to data security in accordance with internationally recognized best practices and principles.

"Earning these certifications is about much more than compliance—it's about trust," said **Andrew Jackson, VP of Corporate Responsibility for Scientific Games**. "Our customers and their players rely on us to protect data and uphold the integrity of every transaction. These certifications reflect the dedications of our teams in the UK, Channel Islands and Ireland, and across our worldwide operations, to maintaining the highest standards of excellence when it comes to information security."

Scientific Games has also achieved international certifications for operational best practices, including Quality Management Systems (ISO: 9001), Environmental Management (ISO: 14001), Occupational Health and Safety (ISO: 45001), and the World Lottery Association's Responsible Gaming certification.

With operations spanning five continents and serving 150 lotteries in 50 countries, Scientific Games earned its latest information security management certifications following an extensive independent, international auditing process.
