

SCIENTIFIC GAMES' KEY DUAL SECURITY SYSTEM EXCEEDS \$70 BILLION MILESTONE IN PRIZE MONEY PROTECTED FOR LOTTERY PLAYERS

LAS VEGAS and ATLANTA – April 7, 2016 – [Scientific Games Corporation](#) (“Scientific Games” or the “Company”) (NASDAQ: SGMS) today announced that the Company’s *Key Dual Security* system has now protected more than \$70 billion (U.S.) in lottery player prize monies since the patented system launched in 2004.

Key Dual Security has been chosen by a select number of lotteries around the world to provide an additional, advanced layer for their instant games. To date, the system has protected more than 5,000 games for lotteries including Italy’s Gratta e Vinci, La Francaise des Jeux in France, UK National Lottery and the Pennsylvania Lottery in the U.S.

Joe Bennett, Vice President Operations, U.S. Instant Products, for Scientific Games, said, “Lotteries and their players must be able to trust the integrity of the games, and *Key Dual Security* delivers on this promise. More than a web of software tool that protect the games, it is our entire approach to instant game security with security integrated into every phase of our game design and manufacturing process. *The Key Dual Security* system, configuration of our servers, global security practices and highly experienced personnel are among the key reasons Scientific Games is consistently selected as the primary, trusted instant game supplier that can protect a lottery organization.”

Rated as a superior security system by independent experts and lottery customers, *Key Dual Security* protects against unauthorized attempts to determine the value of an instant game ticket. Scientific Games invested five years and millions of dollars working with global security experts, including bank and credit card security professionals, to develop this complex and comprehensive system.

In 2014, the Company launched the next generation *Key Dual Security 3.0 (KDS 3.0)*. Like the original product release, *KDS 3.0* is a patented game data security system that requires multiple keys from multiple and independent parties in order to shuffle the prizes within a game. *KDS 3.0* is the most sophisticated instant game protection available in the lottery industry today.

Scientific Games created the lottery industry’s first secure instant game in 1974 and is the world’s largest provider of lottery instant games. With operations on six continents, the Company provides games, services, systems and retail technology to 125 lotteries globally, including nearly every North American lottery.

Forward-Looking Statements

In this press release, Scientific Games makes "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements describe future expectations, plans, results or strategies and can often be identified by the use of terminology such as "may," "will," "estimate," "intend," "plan," "continue," "believe," "expect," "anticipate," "target," "should," "could," "potential," "opportunity," "goal," or similar terminology. These statements are based upon management's current expectations, assumptions and estimates and are not guarantees of timing, future results or performance. Therefore, you should not rely on any of these forward-looking statements as predictions of future events. Actual results may differ materially from those contemplated in these statements due to a variety of risks and uncertainties and other factors, including, among other things: competition; U.S. and international economic and industry conditions, including slow growth of new gaming jurisdictions, slow addition of casinos in existing jurisdictions, and declines in the replacement cycle of gaming machines; ownership changes and consolidation in the gaming industry; opposition to legalized gaming or the expansion thereof; inability to adapt to, and offer products that keep pace with, evolving technology, including any failure of our investment of significant resources in our R&D efforts; inability to develop successful products and services and capitalize on trends and changes in our industries, including the expansion of internet and other forms of interactive gaming; laws and government regulations, including those relating to gaming licenses and environmental laws; dependence upon key providers in our social gaming business; inability to retain or renew, or unfavorable revisions of, existing contracts, and the inability to enter into new contracts; level of our indebtedness, higher interest rates, availability or adequacy of cash flows and liquidity to satisfy indebtedness, other obligations or future cash needs; inability to reduce or refinance our indebtedness; restrictions and covenants in debt agreements, including those that could result in acceleration of the maturity of our indebtedness; protection of our intellectual property, inability to license third party intellectual property, and the intellectual property rights of others; security and integrity of our products and systems and reliance on or failures in information technology and other systems; challenges or disruptions relating to the implementation of a new global enterprise resource planning system; failure to maintain internal control over financial reporting; natural events that disrupt our operations or those of our customers, suppliers or regulators; inability to benefit from, and risks associated with, strategic equity investments and relationships; failure to achieve the intended benefits of our acquisitions; incurrence of restructuring costs; implementation of complex revenue recognition standards or other new accounting standards; changes in estimates or judgments related to our impairment analysis of goodwill or other intangible assets; fluctuations in our results due to seasonality and other factors; dependence on suppliers and manufacturers; risks relating to foreign operations, including fluctuations in foreign currency exchange rates, restrictions on the payment of dividends from earnings, restrictions on the import of products and financial instability, including the potential impact to our business resulting from the affirmative vote in the U.K. to withdraw from the EU, and the potential impact to our instant lottery game concession or VLT lease arrangements resulting from the recent economic and political conditions in Greece; changes in tax laws or tax rulings, or the examination of our tax positions; dependence on key employees; litigation and other liabilities relating to our business, including litigation and liabilities relating to our contracts and licenses, our products and systems, our employees (including labor disputes), intellectual property, environmental laws and our strategic relationships; influence of certain stockholders; and stock price volatility.

Additional information regarding risks, uncertainties and other factors that could cause actual results to differ materially from those contemplated in forward-looking statements is included from time to

time in our filings with the SEC, including the Company's current reports on Form 8-K, quarterly reports on Form 10-Q and its latest annual report on Form 10-K filed with the SEC on February 29, 2016 (including under the headings "Forward Looking Statements" and "Risk Factors"). Forward-looking statements speak only as of the date they are made and, except for Scientific Games' ongoing obligations under the U.S. federal securities laws, Scientific Games undertakes no obligation to publicly update any forward-looking statements whether as a result of new information, future events or otherwise.
